## Disclosures

### Special Risks:

Foreign investments may be volatile and involve additional expenses and special risks, including currency fluctuations, foreign taxes and geopolitical risks. Emerging and developing market investments may be especially volatile. Fixed income investing entails credit and interest rate risks. When interest rates rise, bond prices generally fall. Below-investment-grade (“high yield” or “junk”) bonds are more at risk of default and are subject to liquidity risk. Municipal bonds are subject to default. Investing in MLPs involves additional risks as compared to the risks of investing in common stock, including risks related to cash flow, dilution and voting rights. Energy infrastructure companies are subject to risks specific to the industry such as fluctuations in commodity prices, reduced volumes of natural gas or other energy commodities, environmental hazards, changes in the macroeconomic or the regulatory environment or extreme weather. MLPs may trade less frequently than larger companies due to their smaller capitalizations which may result in erratic price movement or difficulty in buying or selling.

A Basis Point (BPS) is one one hundredth (1/100) of a percent.

### Weighted Average Maturity:

Barclays Aggregate Bond 7.84, Barclays High Yield 6.31, Barclays Agg (AAA) Credit 6.52, Barclays Agg (BAA) Credit 11.49, Merrill AAA Muni 11.33, Merrill BBB Muni 19.18, Citi Non-USD WGBI 9.69, JPM GBI-EM Gl. Div. Index 7.63, JPM EMBI Gl. Div. Index 7.24

### Index Definitions:

The Dow Jones Industrial Average (DJIA) is a price-weighted average of 30 blue-chip stocks that are generally the leaders in their industry. The S&P 500 Index is a broad-based index of domestic stock market performance. The Nasdaq composite index is a broad-based, capitalization-weighted index of all Nasdaq National Market & Small-Cap stocks. The MSCI World Index (Ex-U.S.) is designed to measure the performance of stocks from around the world with the exception of the United States. The MSCI Emerging Markets (EM) Index is designed to measure global emerging market performance. The MSCI EAFE (Europe, Australasia, Far East) Index is designed to measure developed market equity performance, excluding the U.S. and Canada. The MSCI All Country World Index (ACWI) is designed to measure the performance of global equity markets including emerging markets. The MSCI All Country World Small Cap Index (ACWI Small Cap) is designed to measure the performance of global small capitalization stocks including emerging markets. The Barclays Aggregate Bond Index is an investment-grade domestic bond index. Barclays Aggregate 1-3 Year Index is the subset of the Barclays Aggregate Bond Index that has bonds with a maturity of 1-3 years only. The Barclays Aggregate Bond Index AAA measures the performance of only the highest rated (AAA) bonds within the index. The Barclays Aggregate Bond Index BAA measures only the lowest level of investment grade bonds in the index. The Barclays High Yield Index tracks the performance of below-investment-grade, U.S.-dollar-denominated corporate bonds publicly issued in the U.S. domestic market. The Merrill high yield municipal index is designed to measure the performance of below investment grade municipal bonds. The S&P Goldman Sachs Commodity Index (S&P GSCI) is a composite of commodity sector returns representing an unleveraged, long-only investment in commodity futures that is broadly diversified across the spectrum of commodities. The Citi Non-USD World Government Bond Index (WGBI) is an index designed to measure the performance of international bonds. The Merrill AAA Muni Index is designed to measure the performance of investment grade municipal bonds. The Merrill BBB muni Index is designed to measure the performance of below investment grade municipal bonds. The Barclays Inv Grd Corp Index is designed to measure the performance of investment grade corporate bonds in the United States. The JP Morgan Government Bond Index- Emerging Markets (GBI-EM) Global Diversified Index tracks total returns for local-currency-denominated money market instruments in the emerging markets. The Alerian MLP Index is a composite of the 50 most prominent energy Master Limited Partnerships (MLPs). The JP Morgan Emerging Market Index (EMBI) Global Diversified Index is a uniquely weighted version of the EMBI Global Index, which limits the weights of those countries with larger debt stocks by only including specified portions of these countries' eligible current face amounts of debt outstanding. The FTSE National Association of Real Estate Investment Trusts (NAREIT) equity REITS Index is an index consisting of certain companies that own and operate income-producing real estate that have 75% or more of their respective gross invested assets in the equity or mortgage debt of commercial properties. Gold is represented by the dollar price of one Troy ounce of gold. These are hypothetical portfolios and do not represent the performance of any actual fund. Index performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. Each index is unmanaged and cannot be purchased directly by investors. **Past performance does not guarantee future results.**

**Shares of Oppenheimer funds are not deposits or obligations of any bank, are not guaranteed by any bank, are not insured by the FDIC or any other agency, and involve investment risks, including the possible loss of the principal amount invested.**

*Before investing in any of the Oppenheimer funds, investors should carefully consider a fund's investment objectives, risks, charges and expenses.
